Essentially, it's one of the minigame in The Lab, but more developed and cat/mouse themed. The game is well made and runs fluidly.. Anyone who enjoys puzzle platformers needs to play this game. It's mechanics create puzzles that are simple to understand and challenging to solve, and the quick restarts guarantee if you mess up you'll be right back in it immediately. It's been a long time since I've been so captivated by a game that I played for hours without realizing it.. The OoB pacific and all the dlc is a no brainer if your a WW2 gamer this is defintly one of the best i have played strategy at its best one thing i can say Get It!!!. I liked the game, although I don't think it's really worth more than a dollar. It was a fun world to explore, not very challenging, but fun.

I will say, the game really feels like the developer rushed the ending, while jank is present for the whole game, it really ramps up when you're fighting the last few bosses. With the final boss feeling like it was just put there because the game needed it to be considered finished.

If I had anything to recommend to the developer, it would be to take this game, and make a metroidvania style game with the engine, with a heavy emphasis on exploration and atmosphere, I think the way they develop is really geared towards that. Though I might just like the atmosphere because it reminds me of old free indie games I used to play.

Now, as for whether or not you should buy this game, While I'd like to recommend it, I just cant at this price. Like I said, It's worth about a dollar in my eyes. It's a fun experience, there's nothing about the game that is actively offensive except for some occasional glitches or jank that thankfully your character is exempt from, but the ending really really left a bad taste in my mouth.. One of the greatest games in the Final Fantasy series. I highly suggest trying out the New Threat mod for a new experience!
